SAFETY DATA SHEET

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH) & 1272/2008 (CLP)

Revision 1, July 2013

SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

Product identifier

Trade name NK Sulphur **Chemical Name** N/A - mixture N/A - mixture CAS Name Chemical Formula N/A - mixture CAS No. N/A - mixture EINECS No. N/A - mixture REACH Registration No. N/A - mixture

1.2 Relevant identified uses of the substance or mixture and uses advised against

> Identified use(s) Industrial distribution.

> > Industrial USE to formulate chemical product mixtures.

Professional formulation of fertiliser products.

Professional USE as:

Fertiliser on farm - loading and spreading.

Fertiliser in a greenhouse.

Fertilizer – maintenance of equipment.

Other non-specified industry Uses advised against

Reason Lack of related experience or data. The supplier cannot approve this use.

1.3 Details of the supplier of the Safety Data

Sheet

Company Identification CF Fertilisers UK Limited (formally GrowHow UK Ltd)

Ince, Chester CH2 4LB. Telephone +44 (0) 151 357 2777 +44 (0) 151 357 1755 Fax E-mail info@cffertilisers.co.uk

1.4 **Emergency telephone number**

> +44 (0) 151 357 4029 Emergency Phone No.

E-mail Solids.sds@cffertilisers.co.uk

SECTION 2: HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

2.1.1 Regulation (EC) No. 1272/2008 (CLP) Ox. Sol. 3; May intensify fire; oxidizer.

Eye Dam. /Irrit. 2; Causes serious eye irritation.

Directive 67/548/EEC & Directive 2.1.2

1999/45/EC

O Oxidizing; Contact with combustible material may cause fire.

Xi Irritant; Irritating to eyes.

2.2 Label elements

Label elements 221

According to Regulation (EC) No. 1272/2008 (CLP). Trade name

Hazard Pictogram

NK Sulphur

GHS07

GHS03

Revision 1, July 2013

Hazard statement(s) H272: May intensify fire; oxidizer.

H319: Causes serious eye irritation.

Precautionary statement(s) P210, P220, P221, P280

P264, P305 + P351 + P338, P337 + P313

P370 + P378

2.2.2 Label elements

Hazard Symbol

According to Directive 67/548/EEC & Directive 1999/45/EC.

×

Risk Phrases R8: Contact with combustible material may cause fire.

R36: Irritating to eyes.

2.3 Other hazards Product forms slippery surface when combined with water.

2.4 Additional information For full text of H/P phrases see section 16.

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.1 Substances

EC Classification No. 1272/2008

Hazardous ingredient(s)	%W/W	CAS No.	EC No.	REACH Registration No.	Hazard pictogram(s) and Hazard statement(s)
Ammonium	70 - 80	6484-52-2	229-347-8	01-2119490981-27-0020	GHS03, Ox. Sol. 3; H272,
Nitrate					GHS07, Eye Dam./Irrit. 2; H319.
Ammonium	5 – 7	12125-02-9	235-186-4	01-2119489385-24-0011	GHS07, Eye Dam. /Irrit. 2; H319.
Chloride					GHS07, Acute Tox. 4, H302

EC Classification No. 67/548/EEC

Hazardous ingredient(s)	%W/W	CAS No.	EC No.	EC Classification and Risk Phrases
Ammonium Nitrate	70 – 80	6484-52-2	229-347-8	O; R8, Xi; R36.
Ammonium Chloride	5 - 7	12125-02-9	235-186-4	Xn; R22, Xi; R36

3.2 Additional information

For full text of H/P phrases see section 16.

SECTION 4: FIRST AID MEASURES

Inhalation

Remove to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if adverse health effects persist or are severe. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48hrs. It may be dangerous to a person providing aid to give mouth-to-mouth resuscitation.

Skin Contact Wash with soap and water. Get medical attention if symptoms occur.

Eye Contact Rinse with plenty of running water, keeping eyelids open. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. If irritation persists,

get medical attention.

SAFETY DATA SHEET

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH) & 1272/2008 (CLP)

Revision 1, July 2013

Ingestion Wash out mouth with water. If material has been swallowed and the exposed

person is conscious, give small quantities of water to drink. Do not induce vomiting

unless directed to do so by medical personnel.

4.2 Most important symptoms and effects,

both acute and delayed

May cause serious eye irritation. Exposure to decomposition products may cause a health hazard - Methaemoglobinaemia. Serious effects may be delayed

following exposure. May be irritating to mouth, throat and stomach.

4.3 Indication of immediate medical attention

and special treatment needed

Unlikely to be required but if necessary treat symptomatically. In case of exposure to decomposition products in a fire, the person may need to be kept under medical

surveillance for 48hrs.

SECTION 5: FIRE-FIGHTING MEASURES

5.1 Extinguishing Media

Suitable Extinguishing Media

Use flooding quantities of water for extinction.

Unsuitable Extinguishing Media Do not use dry chemical or foam. Do not attempt to smother the fire with steam or

sand.

5.2 Special hazards arising from the substance or mixture

Hazards

Oxidising material. The product itself is not combustible, but it can support

combustion - even in absence of air. May react with combustible substances

creating fire or explosion hazard.

It has high resistance to detonation, though heating under strong confinement can

lead to explosive behavior, especially if contaminated by substances mentioned in

section 10

On heating the product melts, and further heating can cause decomposition releasing toxic fumes. Symptoms from inhalation of these fumes may be delayed.

Hazardous thermal decomposition products

May include the following: nitrogen oxides, sulphur oxides, halogenated compounds (inc chlorine and hydrogen chloride), amine and metal oxides.

Avoid breathing dust, vapours or fumes from burning materials.

5.3 Advice for fire-fighters

Special precautions

Promptly isolate the scene by removing all persons from the vicinity if there is a fire. Move containers from fire area if this can be done with minimal risk. Use

water spray to keep fire exposed containers cool.

Special personnal protective equipment for

fire-fighters

Fire fighters should wear appropriate protective clothing including self-contained breathing apparatus with a full face piece operated in positive pressure mode. Clothing for fire-fighting conforming to European standard EN469 will provide a

basic level of protection for chemical incidents.

Additional information If product stored in bulk is decomposing, use a self-propelled water lance to

penetrate the heap to the seat of the decomposition.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

Wear gloves, eye protection and an approved dust mask if dust is generated during handling. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Provide adequate ventilation.

For emergency responders

6.2 Environmental precautions

If specialised clothing is required to deal with the spillage, see section 8. Avoid dispersal of spilled material, and run off to soil, waterways, drains and sewers. Spillages or uncontrolled discharges into watercourses must be alerted to

the appropriate regulatory body.

SAFETY DATA SHEET

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH) & 1272/2008 (CLP)

Revision 1, July 2013

6.3 Methods and material for containment and cleaning up

Small spill Vacuum or sweep up material, and place in a designated, labeled waste container.

Use spark-proof tools and explosion proof equipment. Do not adsorb onto sawdust

or other combustible materials.

Recover or recycle if possible. Dispose of via a licensed waste contractor if

required.

Large spills Approach release from upwind. Clear as per small spill.

6.4 Reference to other sections Section 1 – emergency contact information.

Section 8 – appropriate personal protective equipment. Section 13 – additional waste treatment information.

SECTION 7: HANDLING AND STORAGE

The information in this section contains generic advice and guidance. The list of identified uses in section 1 should be consulted for any use-specific information provided in the exposure scenario(s).

7.1 Precautions for safe handling

Protective measures Keep away from heat, sparks, open flame, hot surfaces - No smoking.

Provide adequate ventilation. Put on appropriate personal protective equipment (section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Keep in the original container (or an approved alternative made from a compatible material), kept tightly closed when not in use. Keep away from clothing, incompatible materials and combustible materials. Keep away from heat. Empty containers containing residue can be hazardous. Do not reuse container. Product forms

slippery surface when combined with water.

Advice on general occupational hygiene Eating, drinking and smoking should be prohibited in areas where this material is

handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective

equipment before entering eating areas. See also section 8.

7.2 Conditions for safe storage, including any incompatibilities

Recommendations Store in accordance with local regulations. Store in original container protected

from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (section 10), food and drink. Separate from reducing agents and combustible materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be re-sealed until kept upright to prevent spillage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. Keep away from organic

materials, oil and grease.

Appropriate packaging Polyethylene, Polypropylene.

Inappropriate packaging Zinc, Copper.

7.3 Specific end use(s) Fertiliser.

SAFETY DATA SHEET

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH) & 1272/2008 (CLP)

Revision 1, July 2013

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

The information in this section contains generic advice and guidance. The list of identified uses in section 1 should be consulted for any use-specific information provided in the exposure scenario(s). See section 16 for description of exposure types and acronyms

8.1 Control parameters

Occupational Exposure Limits 8.1.1

SUBSTANCE.	CAS No.	TWA (mg/m³)	STEL (mg/m³)	Form	Note:
Ammonium Chloride	12125-02-9	10	20	Fume	EH40/2005 WELs(1997-01-01)

8.1.2 Recommended Monitoring Procedures

If this product contains ingredients with exposure limits, personal and/or workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to European Standard EN689 for methods of the assessment of exposure by inhalation to chemical agents and national guidance documents for methods for the determination of hazardous substances.

8.1.3 PNECs and DNELs

Product	Type	Inhalation (Long Term)	Dermal (Long Term)	Population	Effects
		mg/kg	mg/kg bw/day		
Ammonium Nitrate	DNEL	37.6	21.3	Workers	Systemic
Ammonium Chloride	DNEL	33.5	190	Workers	Systemic

		Compartment Detail						
Product	Туре	Fresh Water mg/litre	Marine Water mg/litre	Intermittent Release mg/litre	Sewage Treatment Plant mg/litre	Soil mg/kg dw		
Ammonium Nitrate	PNEC	0.45	0.045	4.5	18	-		
Ammonium Chloride	PNEC	1.2	0.12	1.2	16.2	0.163		

8.2 **Exposure controls**

Appropriate engineering controls 8.2.1

Not normally required. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or

8.2.2 **Individual Protection Measures** Hygiene Measures

8.2.3 Personal protection equipment Eve/face protection

(in protection (hand and body)

Respiratory protection

A washing facility or water for eye and skin cleaning should be present.

Light eye protection, safety glasses. When a risk assessment indicates safety eyewear complying with an approved standard should be used, recommendation tight fitting goggles CEN: EN166.

Chemical resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary (breakthrough time >8hrs). Protective gloves should be worn under normal conditions of use.

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed, and the risks involved. They should be approved by a specialist before handling this product.

Not normally required. In case of inadequate ventilation wear respiratory protection, recommended Filter P2 (EN143).

SAFETY DATA SHEET

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH) & 1272/2008 (CLP)

Revision 1, July 2013

Thermal hazards When molten: Wear insulating gloves EN407 (heat).

8.2.3 Environmental Exposure Controls Avoid release to the environment. Emissions from ventilation or work process

equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fumes scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce

emissions to acceptable levels.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic physical and

chemical propertiesAppearanceSolidColourPink/greyOdourOdourless

Odour Threshold (ppm)

Not established

pH (Value) >4.5

Melting Point (°C)

Not determined, though pure ammonium nitrate melts around 169°C

Boiling point/boiling range (°C): Not determined Flash Point (°C) Not applicable Evaporation rate Not applicable Flammability (solid, gas) Non-flammable Explosive limit ranges. Not applicable Vapour Pressure (mm Hg) Not applicable Vapour Density (Air=1) Not applicable Relative Density Not determined Bulk Density (g/ml) ca.1000 kg/m³. Solubility (Water) >100g/l. Solubility (Other) Not determined Partition Coefficient (n-Octanol/water) Not determined Auto Ignition Temperature (°C) Not applicable

Decomposition Temperature (°C)

Pure ammonium nitrate begins to decompose at approx. 210°C

Viscosity (mPa.s) Not applicable Explosive properties Not explosive

Oxidising properties Ox. Sol. 3; May intensify fire; oxidizer.

9.2 Other information No additional information.

SECTION 10: STABILITY AND REACTIVITY

10.1 Reactivity Stable under normal conditions. No specific test data related to reactivity available

for this product.

10.2 Chemical stability Stable under normal conditions.

10.3 Possibility of hazardous reactions Hazardous reactions or instability may occur under certain conditions of storage or

use. Conditions may include contact with combustible materials. Reactions may include risk of causing or intensifying fire. Can partially melt and decompose in a fire. Risk of explosion if heated under confinement e.g. handling equipment, tubes

or drains.

10.4 Conditions to avoid Incompatible materials, close proximity to heat or fire.

10.5 Incompatible materials Reducing agents, acids, alkalis, combustible products, organic materials, metal

powders, chromates, zinc, copper, copper alloys, chlorates.

SAFETY DATA SHEET

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH) & 1272/2008 (CLP)

Revision 1, July 2013

10.6 Hazardous Decomposition Product(s)

Under normal conditions of storage and use, hazardous decomposition products should not be produced. If involved in a fire, nitrogen oxides, sulphur oxides, halogenated compounds (inc chlorine and hydrogen chloride), amine and metal oxides may be produced.

SECTION 11: TOXICOLOGICAL INFORMATION

11.1 Acute toxicity & effects

Product	Species	LD50 Oral mg/kg	LD50 Dermal mg/kg	Exposure	References
Ammonium Nitrate	Rat	2,950	>5,000	-	IUCLID5
Ammonium Chloride	Rat	1,410	>2,000	-	IUCLID5

Conclusion / Summary

No known significant effects or critical hazards

11.1.1 Irritation / Corrosion

Product	Species	Result	Score	Exposure	Observation	References
Ammonium Nitrate	Rabbit	Eyes – Irritant	-	-	-	IUCLID5
Ammonium Chloride	Rabbit	Eyes – Irritant	-	-	-	IUCLID5

Skin No known significant effects or critical hazards.

Eyes Eye Irrit. 2; Causes serious eye irritation.

Respiratory No known significant effects or critical hazards.

11.1.2 Sensitization

Skin No known significant effects or critical hazards.

Respiratory No known significant effects or critical hazards.

11.1.2 Mutagenicity No known significant effects or critical hazards

11.1.3 Carcinogenicity No known significant effects or critical hazards.

11.1.4 Teratogenicity No known significant effects or critical hazards.

11.1.5 Reproductive toxicity

Product	Maternal Toxicity	Fertility	Development Toxin	Species	Dose	Exposure	References
Ammonium	-	Negative	Negative	Rat	Oral: > 1,500	28 days	IUCLID5
Nitrate					mg/kg bw/day		
Ammonium	-	Negative	Negative	Rat	Oral: > 1,500	-	IUCLID5
Chloride					mg/kg bw/day		

Conclusion / Summary No known significant effects or critical hazards.

Information on the likely routes of exposure No known significant effects or critical hazards.

11.1.6 Potential acute health effects

Inhalation Exposure to decomposition products may cause a health hazard. Serious effects

may be delayed following exposure.

Ingestion Irritating to mouth, throat and stomach. Ingestion of large quantities may give rise

in extreme cases to the formation of methaemoglobin and cyanosis.

SAFETY DATA SHEET

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH) & 1272/2008 (CLP)

Revision 1, July 2013

Skin Contact No known significant effects or critical hazards.

Eye Contact Causes serious eye irritation.

11.1.7 Symptoms related to the physical,

chemical & toxicological characteristics

Inhalation No specific data.

Ingestion No specific data.

Skin Contact No specific data.

Eye Contact Adverse symptoms may include – pain or irritation, watering, redness.

11.2 Chronic toxicity and effects

11.2.1 Delayed and immediate effects, and also

chronic effects from short and long

term exposure

Potential immediate effects No known significant effects or critical hazards.

Potential delayed effects No known significant effects or critical hazards.

11.2.2 Long Term Exposure

Potential immediate effects No known significant effects or critical hazards.

Potential delayed effects No known significant effects or critical hazards.

11.2.3 Potential Chronic Health Effects

Product	Species	Result	Dose (mg/kg)	Exposure	References
		Chronic NOAEL Oral	256	28 days	IUCLID5
Ammonium Nitrate	Rat	Sub-acute NOEC Inhalation	>185	2 weeks (5 hr/day)	IUCLID5
Ammonium Chloride	Rat	Sub-chronic NOAEL Oral	684	10 weeks	IUCLID5

Conclusion / Summary No known significant effects or critical hazards

11.2.4 Mutagenicity No known significant effects or critical hazards

11.2.5 Carcinogenicity No known significant effects or critical hazards

11.2.6 Teratogenicity No known significant effects or critical hazards

11.2.7 Developmental Effects No known significant effects or critical hazards

11.2.8 Fertility Effects No known significant effects or critical hazards

11.3 Other information None.

SAFETY DATA SHEET

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH) & 1272/2008 (CLP)

Revision 1, July 2013

SECTION 12: ECOLOGICAL INFORMATION

12.1 Toxicity

Product	Species	Result	Environment	Dose (mg/litre)	Exposure	References
	Fish	Acute LC50	Fresh water	447	48 hr	
Ammonium Nitrate	Daphnia	Acute EC50	Fresh water	490	48 hr	IUCLID5
	Aquatic Plants	Acute EC 50	Marine water	1,700	10 day	
	Fish	Acute LC50	Fresh water	209	96 hr	
	Fish	Acute LC50	Marine water	174	96 hr	
Ammonium Chloride	Daphnia	Acute EC50	Fresh water	101	48 hr	IUCLID5
	Aquatic Plants	Acute EC50	Fresh water	1,300	5 day	
	Aquatic Plants	Acute EC50	Marine water	90.4	10 day	

Conclusion / Summary No known significant effects or critical hazards.

12.2 Persistence and degradability No known significant effects or critical hazards.

12.3 Bioaccumulative potential No known significant effects or critical hazards.

12.4 Mobility in soil

Soil / water partition coefficient Not available.

Mobility The NO₃ ion is mobile; the NH₄ ion is adsorbed by soil particles. The K⁺ ion in the

soil solution is adsorbed by clay minerals and only in light soils where these are

absent can part of the potassium be leached.

12.5 Results of PBT and vPvB assessment Not classified as PBT or vPvB.

12.6 Other adverse effects No known significant effects or critical hazards.

SECTION 13: DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods

Methods of disposal

13.1.1 Product

This product and its packaging must be disposed of in a safe way.

The generation of waste should be avoided or minimized wherever possible. Significant quantities of waste product should not be disposed of via the foul sewer, but processed in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any

regional local authority requirements.

Hazardous waste The classification of the product may meet the criteria for a hazardous waste.

13.1.2 Packaging

Methods of disposal The generation of waste should be avoided or minimized wherever possible. Care

should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may contain some product residues. Avoid dispersal of spilled material and runoff, and contact with soil, waterways, drains

and sewers.

13.2 Additional information Disposal should be in accordance with local/state/national legislation.
