Dinitrogen Tetroxide, Mixed Oxides of Nitrogen

Safety Data Sheet

Classified according to the UN-GHS as adopted in the US Hazard Communication Standard (HCS 2012), the Canada Hazardous Products Regulations (WHMIS 2015) and Mexico NOM-018-STPS-2015

Revision Date: 1 July 2021  Date of issue: 1 July 2021  Supersedes Date: 28 October 2015

SECTION 1: IDENTIFICATION

1.1. Product Identifier

Product Name: Dinitrogen Tetroxide, Mixed Oxides of Nitrogen
Product Code: STCC: 4920174
Formula: N2O4
Synonyms: Nitrogen Oxide, Nitrogen Dioxide, Nitrogen Peroxide, Nitrogen Tetroxide, Dinitrogen Tetroxide, Tetra Oxide, NTO

1.2. Intended Use of the Product

1.3. Name, Address, and Telephone of the Responsible Party

Company
CF Industries Sales, LLC
4 Parkway North, Suite 400
Deerfield, Illinois 60015-2590
847-405-2400
www.cfindustries.com

1.4. Emergency Telephone Number

Emergency Number : 800-424-9300
For Chemical Emergency, Spill, Leak, Fire, Exposure, or Accident, call CHEMTREC – Day or Night

SECTION 2: HAZARDS IDENTIFICATION

2.1. Classification of the Substance or Mixture

Ox. Gas 1 H270
Liquefied gas H280
Acute Tox. 1 (Inhalation:gas) H330
Skin Corr. 1B H314
Eye Dam. 1 H318
STOT RE 2 H373

Full text of H-phrases: see section 16

2.2. Label Elements

Hazard Pictograms : 

Signal Word : Danger
Hazard Statements :
H270 - May cause fire or explosion; strong oxidizer.
H280 - Contains gas under pressure; may explode if heated.
H314 - Causes severe skin burns and eye damage.
H330 - Fatal if inhaled.
H373 - May cause damage to organs through prolonged or repeated exposure.

Precautionary Statements :
P220 - Keep away from clothing and other combustible materials.
P244 - Keep reduction valves/valves and fittings free from oil and grease.
P260 - Do not breathe gas, vapors, spray, mist, fume.
P264 - Wash hands, forearms, and other exposed areas thoroughly after handling.
P271 - Use only outdoors or in a well-ventilated area.
P280 - Wear respiratory protection, eye protection, face shield, protective clothing, protective gloves.
P284 - [In case of inadequate ventilation] wear respiratory protection.
P301+P330+P331 - If swallowed: rinse mouth. Do NOT induce vomiting.
P303+P361+P353 - water/shower and soap if on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower.
P304+P340 - If inhaled: Remove person to fresh air and keep at rest in a position comfortable for breathing.
P305+P351+P338 - If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310 - Immediately call a poison center or doctor.
Dinitrogen Tetroxide, Mixed Oxides of Nitrogen

Safety Data Sheet
Classified according to the UN-GHS as adopted in the US Hazard Communication Standard (HCS 2012), the Canadian Hazardous Products Regulations (WHMIS 2015) and Mexico NOM-018-STPS-2015

P314 - Get medical advice/attention if you feel unwell.
P320 - Specific treatment is urgent (see Section 4 on this SDS, Monitor for respiratory distress. Administer supplemental oxygen if trained to do so).
P363 - Wash contaminated clothing before reuse.
P370+P376 – In case of fire: Stop leak if safe to do so.
P370+P378 - In case of fire: Use appropriate media (see section 5) to extinguish.
P403+P233 - Store in a well-ventilated place. Keep container tightly closed.
P405 - Store locked up.
P410+P403 - Protect from sunlight. Store in a well-ventilated place.
P501 - Dispose of contents/container in accordance with local, regional, national, territorial, provincial, and international regulations.

2.3. Other Hazards
Exposure may aggravate those with pre-existing eye, skin, or respiratory conditions.

2.4. Unknown Acute Toxicity
No data available

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.1. Substance Not applicable

3.2. Mixture

Full text of H-phrases: see section 16

More than one of the ranges of concentration prescribed by the Controlled Products Regulations has been used where necessary, due to varying composition.

SECTION 4: FIRST AID MEASURES

4.1. Description of First Aid Measures
First-aid Measures General: Never give anything by mouth to an unconscious person. Seek medical attention immediately.
First-aid Measures After Inhalation: First, take proper precautions to ensure your own safety before attempting rescue (e.g. wear appropriate respiratory protective equipment, use the buddy system), then remove the exposed person to fresh air. Keep at rest in a position comfortable for breathing. Seek immediate medical advice. Monitor for respiratory distress. Administer supplemental oxygen if trained to do so.
First-aid Measures After Skin Contact: Immediately flush skin with plenty of water for at least 60 minutes. Remove/Take off immediately all contaminated clothing. Immediately call a POISON CENTER or doctor.
First-aid Measures After Eye Contact: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing for at least 60 minutes. Immediately call a POISON CENTER or doctor/physician.
First-aid Measures After Ingestion: Rinse mouth. Do NOT induce vomiting. Immediately call a POISON CENTER or doctor/physician.

4.2. Most important symptoms and effects, both acute and delayed
Symptoms/Injuries: Fatal if inhaled. Causes severe skin burns and eye damage. May cause damage to organs through prolonged or repeated exposure.
Symptoms/Injuries After Inhalation: Fatal if inhaled. Symptoms may be delayed. A single acute exposure may cause death. Repeat exposure to small amounts of nitrogen oxides may cause lung damage.
Symptoms/Injuries After Eye Contact: Causes permanent damage to the cornea, iris, or conjunctiva. Symptoms may include: Redness. Pain. Blurred vision. Severe burns. Blindness.

1 July 2021 EN (English US) 2/10
**Dinitrogen Tetroxide, Mixed Oxides of Nitrogen**

Safety Data Sheet
Classified according to the UN-GHS as adopted in the US Hazard Communication Standard (HCS 2012), the Canadian Hazardous Products Regulations (WHMIS 2015) and Mexico NOM-018-STPS-2015

**Chronic Symptoms:** May cause pulmonary edema.

4.3. **Indication of Any Immediate Medical Attention and Special Treatment Needed**

Seek medical attention immediately. Acute respiratory effects, including pulmonary edema, may be delayed.

### SECTION 5: FIRE-FIGHTING MEASURES

5.1. **Extinguishing Media**

**Suitable Extinguishing Media:** Use extinguishing media appropriate for surrounding fire.

**Unsuitable Extinguishing Media:** Do not intentionally add water directly into the vessel containing dinitrogen tetroxide as this can lead to an overpressure event. Do not use a heavy water stream but rather use a water fog to contain NOx fume from spreading. Be aware that fogged water and dinitrogen tetroxide vapor will condense into liquid nitric acid.

5.2. **Special Hazards Arising From the Substance or Mixture**

**Fire Hazard:** Strong oxidizer: increases the burning rate of combustible materials.

**Explosion Hazard:** The substance is a strong oxidant and reacts with combustible and reducing materials, causing fire and explosion hazard. Explosions may occur on contact with ammonia, boron trichloride, carbon disulfide, cyclohexane, fluorine, formaldehyde, hydrazine, nitrobenzene, toluene, incompletely halogenated hydrocarbons, propylene, alcohols, and ozone. May be corrosive to metals (Aluminum, zinc, tin) when wet and may produce explosive hydrogen gas.

**Reactivity:** ‘Oxidizing’: substances and preparations which exhibit highly exothermic reactions when in contact with other substances, particularly flammable substances.

5.3. **Advice for Firefighters**

**Precautionary Measures Fire:** Exercise caution when fighting any chemical fire. Under fire conditions closed containers may rupture or explode. In presence of moisture, the material is corrosive to aluminum, zinc and tin producing highly flammable hydrogen gas.

**Firefighting Instructions:** Contain fire and let burn. If fire must be fought, water spray or fog is recommended. Flood fire area with water from a distance. Do not add water directly into containers of dinitrogen tetroxide as this may lead to an overpressure event. Do not direct water at spill or source of the leak. Move containers from the fire area if you can do it without risk. Do not move cargo or vehicle if cargo has been exposed to heat. Fight fire from maximum distance or use unmanned hose holders or monitor nozzles. Apply cooling water to outsides of containers that are exposed to flames until well after fire is out. Stay away from ends of tanks due to exploding potential when tanks are involved in a fire. If tank, rail car or truck is involved in a fire, isolate for 1/2 mile in all directions; also, consider initial evacuation for 1/2 mile in all directions. For massive fire, use unmanned hose holders or monitor nozzles; if this is impossible, withdraw from area and let fire burn.

**Protection During Firefighting:** Do not enter fire area without proper protective equipment, including respiratory protection.

### SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1. **Personal Precautions, Protective Equipment and Emergency Procedures**

**General Measures:** Keep away from open flames, hot surfaces and sources of ignition. No smoking. Do not allow contact with incompatible materials (see section 10). Do not breathe gas, vapors, mist, spray, or fumes. Do not get in eyes, on skin, or on clothing. Eliminate every possible source of ignition. Isolate 500 feet in all directions. Protect persons downwind 1.0 mile (day) or 2.5 miles (night).

6.1.1. **For Non-emergency Personnel**

**Protective Equipment:** Use appropriate personal protective equipment (PPE).

**Emergency Procedures:** Isolate 500 feet in all directions. Protect persons downwind 1.0 mile (day) or 2.5 miles (night). Evacuate unnecessary personnel and move upwind at least 500 feet. Eliminate ignition sources.

6.1.2. **For Emergency Responders**

**Protective Equipment:** Equip cleanup crew with proper protection.

**Emergency Procedures:** Upon arrival at the scene a first responder is expected to protect oneself and the public, secure the area, and call for the assistance of trained personnel as conditions permit.

6.2. **Environmental Precautions**

Contain any spills with dikes or absorbents to prevent migration and entry into sewers or streams. Contact competent authorities after a spill.

6.3. **Methods and Material for Containment and Cleaning Up**

**For Containment:** As an immediate precautionary measure, isolate spill or leak area in all directions.

**Methods for Cleaning Up:** Contact competent authorities after a spill.

6.4. **Reference to Other Sections**

See heading 8, Exposure Controls and Personal Protection. See Section 13, Disposal Considerations.
Dinitrogen Tetroxide, Mixed Oxides of Nitrogen
Safety Data Sheet
Classified according to the UN-GHS as adopted in the US Hazard Communication Standard (HCS 2012), the Canadian Hazardous Products Regulations (WHMIS 2015) and Mexico NOM-018-STPS-2015

SECTION 7: HANDLING AND STORAGE

7.1. Precautions for Safe Handling

Additional Hazards When Processed: When heated to decomposition, emits toxic fumes. Do NOT breathe (dust, vapor, mist, gas). Do not get in eyes, on skin, or on clothing. Do not handle until all safety precautions have been read and understood. Do not pressurize, cut, or weld containers. Do not store near or around flammable materials.

Precautions for Safe Handling: Use only outdoors or in a well-ventilated area. Avoid all eye and skin contact and do not breathe vapor and mist.

Hygiene Measures: Handle in accordance with good industrial hygiene and safety procedures. Wash hands and other exposed areas with mild soap and water before eating, drinking, or smoking and again when leaving work. Wash contaminated clothing before reuse.

7.2. Conditions for Safe Storage, Including Any Incompatibilities

Technical Measures: Any proposed use of this product in elevated-temperature processes should be thoroughly evaluated to assure that safe operating conditions are established and maintained. Comply with applicable regulations.

Storage Conditions: Store in a dry, cool and well-ventilated place. Keep in fireproof place. Store locked up. Keep/Store away from combustible and organic materials and all ignition sources. Do not use zinc or copper (brass, bronze, etc.) alloys due to incompatibility. Also, cast iron, malleable iron, or ductile iron are susceptible to corrosion.

7.3. Specific End Use(s) Fuel Oxidizer, Propellant, Sterilizer

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1. Control Parameters

For substances listed in section 3 that are not listed here, there are no established exposure limits from the manufacturer, supplier, importer, or the appropriate advisory agency including: ACGIH (TLV), NIOSH (REL), or OSHA (PEL).

8.2 Exposure Controls

Appropriate Engineering Controls: Gas detectors should be used when toxic gases may be released. Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Ensure all national/local regulations are observed. Provide sufficient ventilation to keep nitrogen monoxide vapors below the permissible exposure limit. Product to be handled in a closed system and under strictly controlled conditions. Smoking, open flames, and unauthorized sparking or flame-producing devices is prohibited.

Materials for Protective Clothing: Acid-resistant clothing.

Hand Protection: Acid-resistant protective gloves.

Eye Protection: Chemical safety goggles and face shield.

Skin and Body Protection: Acid-resistant clothing. Rubber apron, boots.

Respiratory Protection: A NIOSH-approved self-contained breathing apparatus (SCBA) operated in a pressure demand or other positive pressure mode or equivalent respirator should be used in that approach the threshold limit PEL of 5 ppm.

Other Information: When using, do not eat, drink or smoke.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on Basic Physical and Chemical Properties

Physical State: Gas
Appearance: Reddish-brown to Green, depending on % NO
Odor: Pungent acidic odor
Odor Threshold: 1 ppm
pH: Not applicable
Evaporation Rate: No data available
Melting Point: Not available
Freezing Point: -69 - 12 °F (-56 - -11 °C)
Boiling Point: > 16 - 70 °F (> -9 - 21 °C)
Flash Point: Not applicable
Auto-ignition Temperature: Not applicable
Decomposition Temperature: > 320 °F (160 °C)
Flammability (solid, gas): Not flammable
Vapor Pressure: 32.193 - 90.699 psia @ 77 °F (25 °C)
Relative Vapor Density at 20 °C: 1.58
Specific Gravity: 1.380 - 1.431 @77 °F (25 °C)
Density: 12.07 lb/gal
Solubility: No data available
Dinitrogen Tetroxide, Mixed Oxides of Nitrogen

Safety Data Sheet
Classified according to the UN-GHS as adopted in the US Hazard Communication Standard (HCS 2012), the Canadian Hazardous Products Regulations (WHMIS 2015) and Mexico NOM-018-STPS-2015

**Partition Coefficient: N-Octanol/Water**: No data available
**Viscosity**: No data available
**Viscosity, Dynamic**: 0.00028 lb/(ft•s) @ 20 °C (68 °F)
**Lower Flammable Limit**: Not applicable
**Upper Flammable Limit**: Not applicable
**Critical Pressure**: 100 atm
**VOC content**: 100%

### SECTION 10: STABILITY AND REACTIVITY

10.1. **Reactivity**: ‘Oxidizing’: substances and preparations which exhibit highly exothermic reactions when in contact with other substances, particularly flammable substances.

10.2. **Chemical Stability**: The substance is a strong oxidant and reacts with combustible and reducing materials, causing fire and explosion hazard.

10.3. **Possibility of Hazardous Reactions**: Hazardous polymerization will not occur.

### SECTION 11: TOXICOLOGICAL INFORMATION

11.1. **Information On Toxicological Effects**

**Acute Toxicity**: Inhalation: gas: Fatal if inhaled.

**Skin Corrosion/Irritation**: Causes severe skin burns and eye damage.

**Serious Eye Damage/Irritation**: Causes serious eye damage.

**Respiratory or Skin Sensitization**: Not classified

**Carcinogenicity**: Not classified

**Reproductive Toxicity**: Not classified

**Specific Target Organ Toxicity (Single Exposure)**: Not classified

**Specific Target Organ Toxicity (Repeated Exposure)**: May cause damage to organs (lungs) through prolonged or repeated exposure.

**Aspiration Hazard**: Not classified

**Symptoms/Injuries After Inhalation**: Fatal if inhaled. Symptoms may be delayed. A single acute exposure may cause death. Repeat exposure to small amounts of nitrogen oxides may cause lung damage.

**Symptoms/Injuries After Skin Contact**: Corrosive. Causes burns. Symptoms may include: Redness. Pain. Serious skin burns. Blisters.

**Symptoms/Injuries After Eye Contact**: Causes permanent damage to the cornea, iris, or conjunctiva. Symptoms may include: Redness. Pain. Blurred vision. Severe burns.

**Chronic Symptoms**: May cause pulmonary edema.

### SECTION 12: ECOLOGICAL INFORMATION

12.1. **Toxicity**

**Ecology - General**: Harmful to aquatic life.
### 12.2. Persistence and Degradability
Not established

### 12.3. Bioaccumulative Potential

### 12.4. Mobility in Soil
No additional information available

### 12.5. Other Adverse Effects
None known

### Other Information:
Avoid release to the environment.

### SECTION 13: DISPOSAL CONSIDERATIONS

#### 13.1. Waste treatment methods

**Sewage Disposal Recommendations:** Do not empty into drains; dispose of this material and its container in a safe way.

**Waste Disposal Recommendations:** Dispose of waste material in accordance with all local, regional, national, provincial, territorial and international regulations.

### SECTION 14: TRANSPORT INFORMATION

**In Accordance with DOT**
- **Proper Shipping Name:** DINITROGEN TETROXIDE
- **Hazard Class:** 2
- **Identification Number:** UN1067
- **Label Codes:** 2.3, 5.1, 8
- **ERG Number:** 124

**In Accordance with IMDG**
- **Proper Shipping Name:** DINITROGEN TETROXIDE (NITROGEN DIOXIDE)
- **Hazard Class:** 2
- **Division:** 2.3
- **Subsidiary Risk(s):** 5.1, 8
- **Identification Number:** UN1067
- **Label Codes:** 2.3, 5.1, 8
- **EmS-No. (Fire):** F-C
- **EmS-No. (Spillage):** S-W

**In Accordance with IATA**
- **Proper Shipping Name:** DINITROGEN TETROXIDE
- **Identification Number:** UN1067
- **Hazard Class:** 2
- **Label Codes:** 2.3, 5.1, 8
- **Division:** 2.3
- **Subsidiary Risk(s):** 5.1, 8
- **ERG Code (IATA):** 2PX

**In Accordance with MX-SCT**
- **Proper Shipping Name:** DINITROGEN TETROXIDE
- **Identification Number:** UN1067
- **Hazard Class:** 2
- **Label Codes:** 2.3, 5.1, 8

### 15.3 Canadian Regulations

**Nitrogen monoxide (10102-43-9)**

Listed on the Canadian DSL (Domestic Substances List)

**CEPA - Schedule I - List of Toxic Substances**

| Environmental Emergencies - Part 2 Substances - Substances Hazardous When Inhaled | 10 % Minimum mixture concentration (anhydrous, by weight) 4.5 tonnes Minimum quantity |
| WHMIS Classification | Gases under pressure - Liquefied gas H280 Oxidizing gas - Category 1 H270 |

**Dinitrogen tetraoxide (10544-72-6)**

Listed on the Canadian NDSL (Non-Domestic Substances List)

### 15.4 Mexico Regulations

**Nitrogen monoxide (10102-43-9)**

National Inventory of Chemical Substances (INSQ)

Workplace Threshold Quantities of Hazardous Chemicals: 120 kg

**Dinitrogen tetraoxide (10544-72-6)**

National Inventory of Chemical Substances (INSQ)

Workplace Threshold Quantities of Hazardous Chemicals: 120 kg

### SECTION 16: OTHER INFORMATION, INCLUDING DATE OF PREPARATION OR LAST REVISION

**Revision Date**: 1 July 2021

**GHS Full Text Phrases**:

- Acute Tox. 1 (Inhalation:gas) Acute toxicity (inhalation:gas) Category 1
- Acute Tox. 3 (Inhalation:gas) Acute toxicity (inhalation:gas) Category 3
- Compressed gas Gases under pressure Compressed gas
- Eye Dam. 1 Serious eye damage/eye irritation Category 1
Dinitrogen Tetroxide, Mixed Oxides of Nitrogen

Safety Data Sheet
Classified according to the UN-GHS as adopted in the US Hazard Communication Standard (HCS 2012), the Canadian Hazardous Products Regulations (WHMIS 2015) and Mexico NOM-018-STPS-2015

**NFPA Health Hazard**: 4 - Very short exposure could cause death or serious residual injury even though prompt medical attention was given.

**NFPA Fire Hazard**: 0 - Materials that will not burn.

**NFPA Reactivity**: 0 - Normally stable, even under fire exposure conditions, and are not reactive with water.

**NFPA Specific Hazard**: OX - This denotes an oxidizer, a chemical which can greatly increase the rate of combustion/fire.

**HMIS III Rating**: Health - 4 Severe Hazard - Life-threatening, major or permanent damage may result from single or repeated overexposures

**Flammability**: 0 Minimal Hazard

**Physical**: 0 Minimal Hazard
